0.1 Purpose

This style is created for writing notes, and it is designed to reduce eye strain when reading PDFs.

0.2 Colors

Colors are inspired by GruvBox and JetBrains Dracula themes, but with WarmBox does its own thing: it doesn't use white color, because I consider it too aggressive and there is no red in "normal" text - it is only allowed in errors.

0.3 Looks

0.3.1 Code Block

```
1   import java.util.stream.*;
2   public class JavaStreamExample {
3       // comment
4       public static void main(String[] args){
5           Stream.iterate(1, element -> element + 1)
6           .filter(element -> element % 5 == 0)
7           .limit(5)
8           .forEach(System.out::println);
9
10          int i = 1
11          System.out.println("String Example" + i);
12      }
```

0.3.2 Code Output

```
5
10
15
20
25
String Example 1
```

0.3.3 Important Frame

Hiding internal state and requiring all interaction to be performed through an object's methods is known as *data encapsulation* - a fundamental principle of object-oriented programming.
